My name is Solomon Kamara.

SolomonPortfolio: UI and UX design document · SWE 3409 Individual Assignment 2 · INES-Ruhengeri

IDENTITY

Item	Detail
Application name	SolomonPortfolio
Student	Solomon Kamara
Registration number	2423982
Verification code	MOB-A2-3982
Course	SWE 3409 Mobile Application Development
Technology	React Native, Expo, TypeScript
Android package	com.solomonkamara.portfolio
Version	1.0.0

CONCEPT

SolomonPortfolio is an offline-first personal portfolio. A recruiter can understand who I am, what I can build and how I lead in under two minutes, without a paper CV and without an internet connection.

STUDENT IDENTITY

Final-year BSc Software Engineering student at INES-Ruhengeri in Musanze. I build and deploy web platforms with Next.js, FastAPI and PostgreSQL, work as a freelance developer, and founded the Association of Liberians in Musanze (ALM), where I served as Secretary General.

INTENDED RECRUITER

An internship or graduate-programme hiring manager, or an innovation-challenge judge, who opens the app on a phone during a short meeting and may have an unreliable connection.

VISUAL DIRECTION

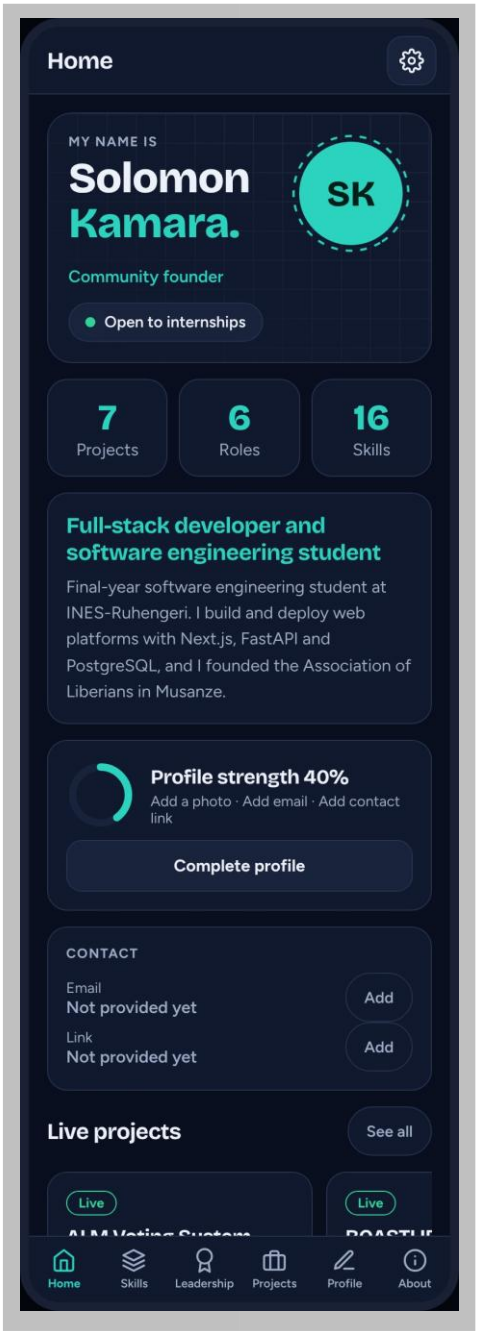

- Engineering blueprint. Deep navy surfaces, a faint 26 px grid in the hero
- card and a teal accent (violet and amber can be chosen in Settings). Modern type. Bricolage Grotesque for display text, Figtree for
- text.

Purposeful motion. The name rises in, a role ticker cycles four roles and numbers count up; all looping motion stops when the device asks for reduced motion.

- Dark by default, with a light theme, both checked for contrast (page 5).

STRUCTURE IN ONE LINE

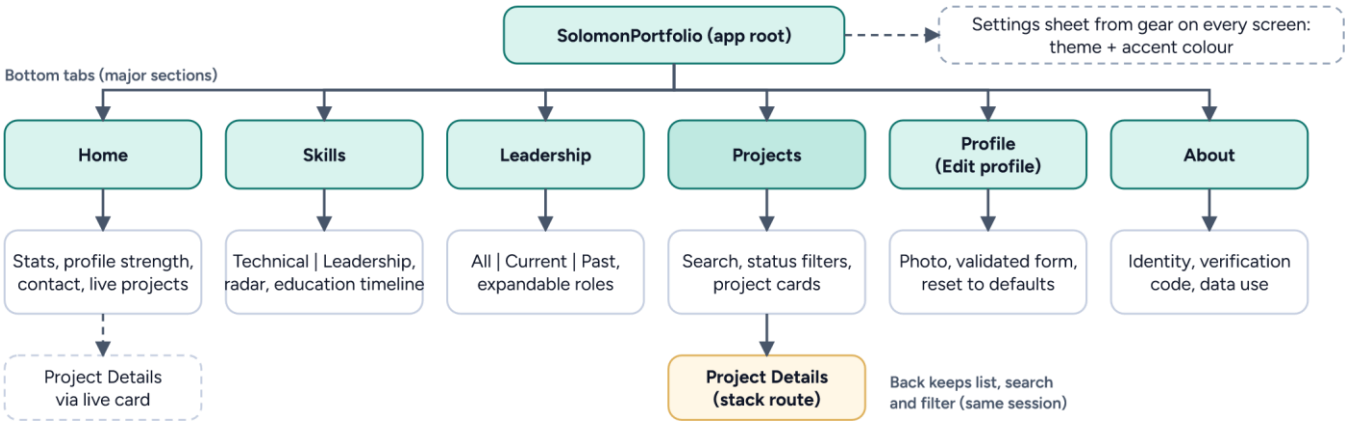

Six bottom tabs (Home, Skills, Leadership, Projects, Profile, About) plus a Project Details stack screen and a Settings sheet.

Home screen (high-fidelity prototype) body

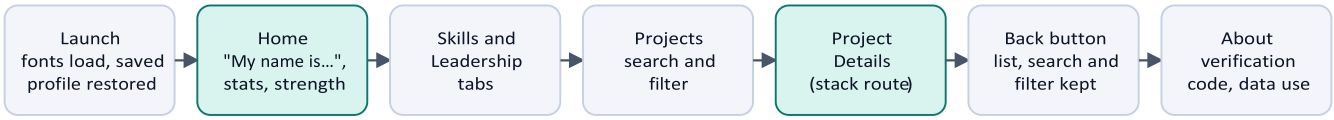

User flow and information architecture

INFORMATION ARCHITECTURE

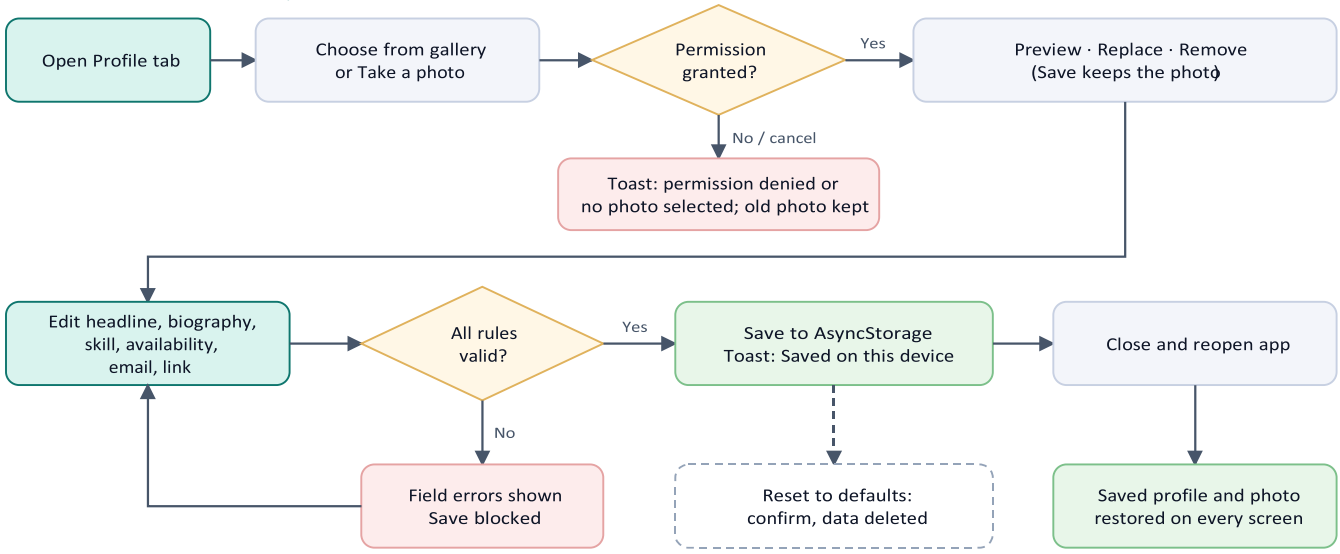

> Navigation rules. Bottom tabs hold the six major sections. Projects is a stack: Projects list, then Project Details. Android Back from Project Details returns to the list with the same search text and filter, so the session is preserved. Opening a Live project card on Home uses the same Project Details screen.

FLOW 1: A RECRUITER IN TWO MINUTES

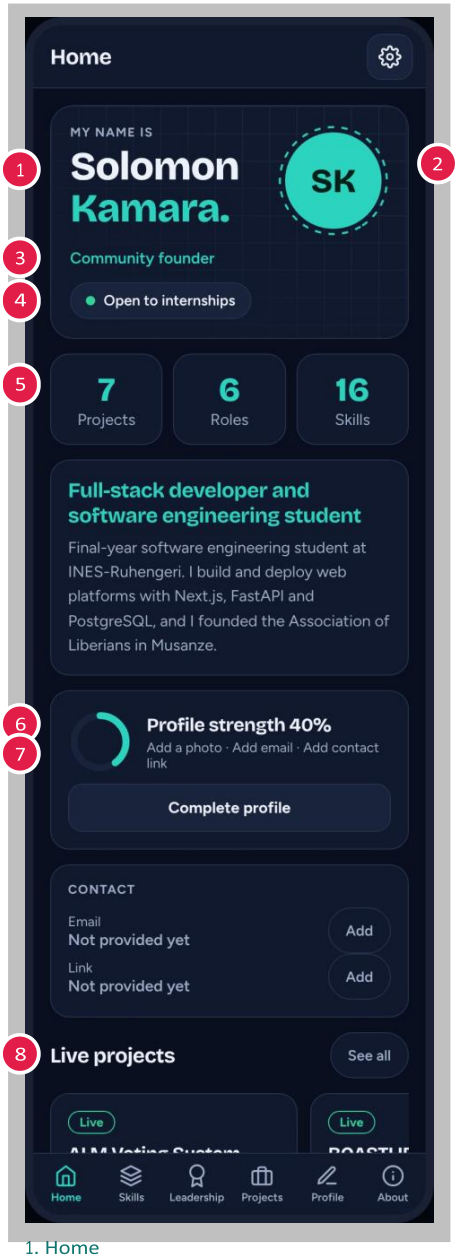

FLOW 2: PROFILE EDITING, MEDIA SELECTION AND SAVED STATE

Everything is stored on the device with AsyncStorage (profile text, settings and the local photo path; the photo file is copied into the app's document folder). Nothing in these flows needs a network connection.

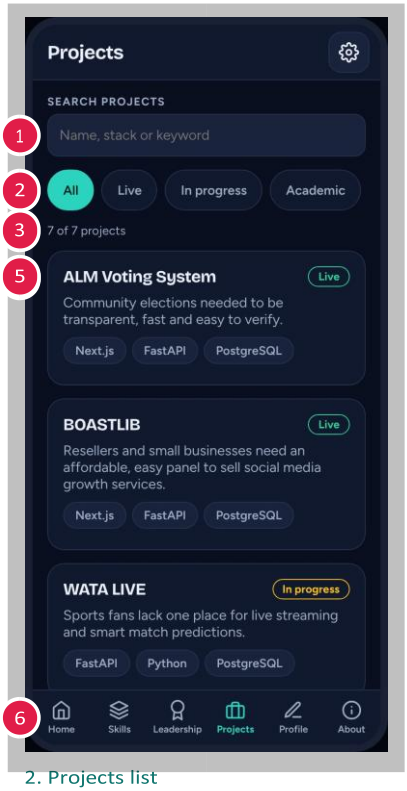

Annotated wireframes: Home, Projects and Project Details

The wireframes are high-fidelity prototype screens. Numbered markers match the notes under each screen.

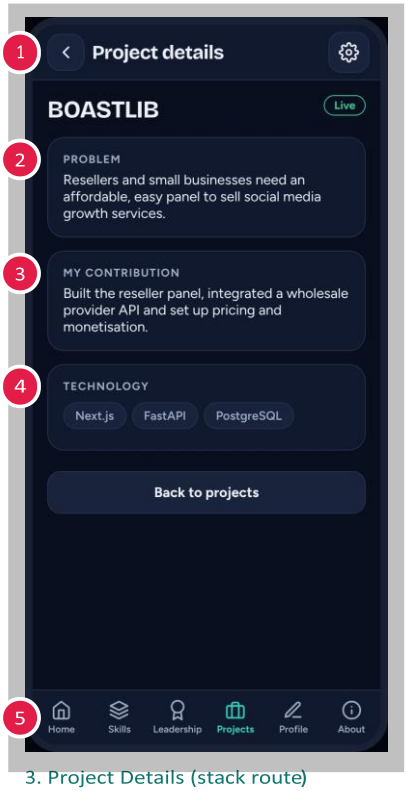

1. Home

1. "My name is Solomon Kamara." The required first sentence; the two name words rise in with a short stagger and the full sentence is the accessibility label.
2. Avatar with initials, or the saved photo, inside a slowly rotating dashed ring.
3. Role ticker cycles Full-stack developer, Community founder, Software engineering student, Secretary General.
4. Availability pill with a pulsing dot (text edited in Profile).
5. Stats are derived from the data: projects, roles and skills.
6. Profile strength ring lists what is missing and links to Edit profile.
7. Contact card empty state: "Not provided yet" with an Add chip.
8. Live projects scroller; a tap opens Project Details.

2. Projects list

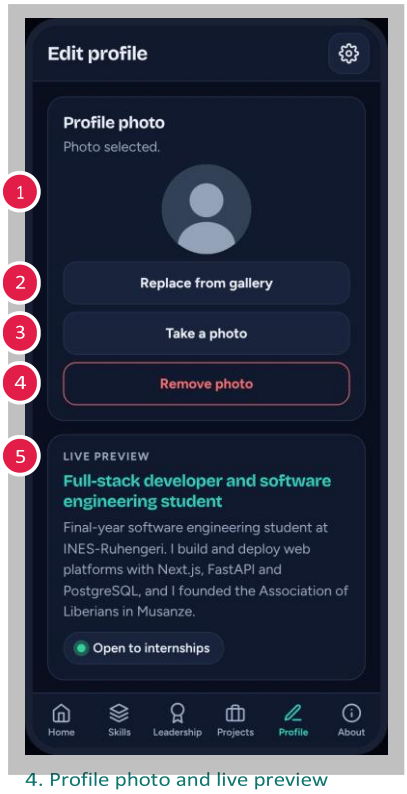

1. Labelled search field (name, stack or keyword).
2. Status filter chips: All, Live, In progress, Academic (44 px targets).
3. Result count "N of 7 projects".
4. Project card with name, problem summary and technology tags; opens the stack screen.
5. Status badge uses text plus colour, never colour alone.
6. Bottom tabs: active tab in accent colour with a bold label.

3. Project Details (stack route)

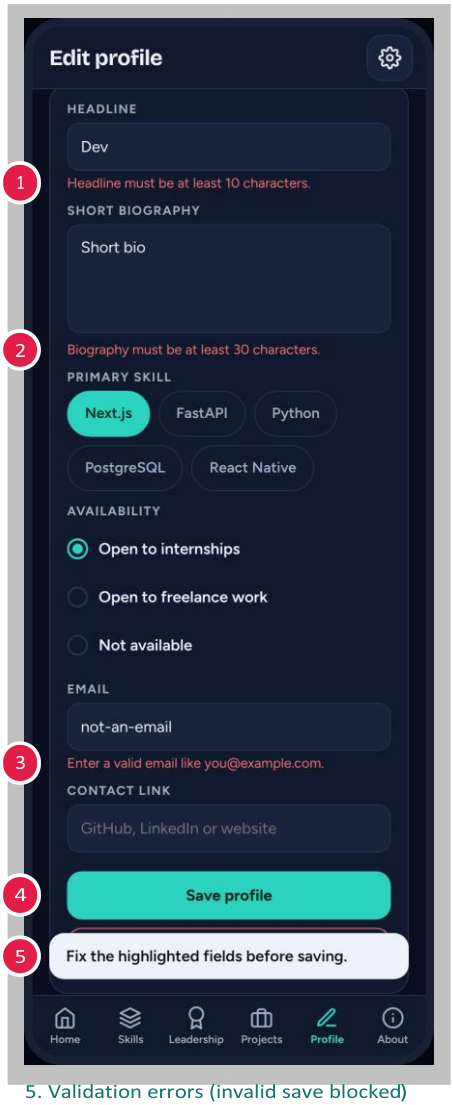

1. Back arrow returns to the list with search and filter kept.
2. Problem the project solves.
3. My contribution, written in the first person.
4. Technology used.
5. Tab bar stays visible inside the stack.

Annotated wireframes: Profile editor, error and empty states

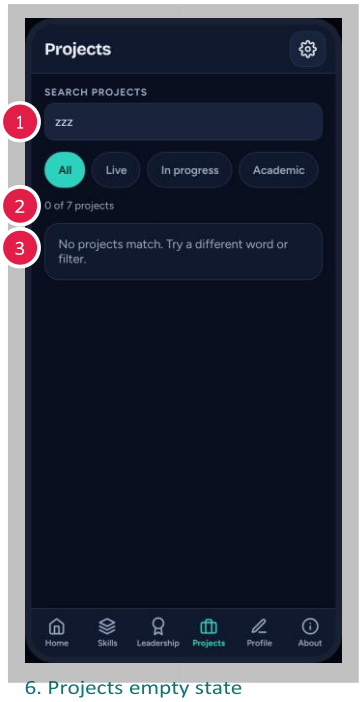

4. Profile photo and live preview

1. Photo preview: the chosen picture, or the initials avatar when none is set.
2. "Replace from gallery" (reads "Choose from gallery" when empty).
3. "Take a photo" asks for camera permission; if denied, a message is shown and the old photo is kept.
4. "Remove photo" returns to the initials avatar.
5. Live preview of headline, biography and availability while typing.

5. Validation errors (invalid save blocked)

1. Headline error: 10 to 80 characters.
2. Biography error: 30 to 300 characters.
3. Email error: must be a valid address when one is given.
4. Save profile is blocked until every field is valid.
5. Toast: "Fix the highlighted fields before saving."

6. Projects empty state

1. Search text that matches nothing.
2. Result count reads "0 of 7 projects".
3. Empty state: "No projects match. Try a different word or filter."

VALIDATION RULES AND OTHER STATES

Field or state	Rule	Message or behaviour
Headline	10 to 80 characters	"Headline must be at least 10 characters."
Short biography	30 to 300 characters	"Biography must be at least 30 characters."
Email (optional)	Valid address if provided	"Enter a valid email like you@example.com."
Contact link (optional)	At least 4 characters if provided	"Link must be at least 4 characters."
Primary skill, availability	One option always selected	Chips and radio rows, so these cannot be empty.

No photo / denied / cancelled	Initials avatar; permission or cancel handled	Message shown, previous photo kept, no crash.
Reset	Confirmation first	Saved data deleted, defaults restored, toast shown.

Visual and accessibility decisions

COLOUR TOKENS (DARK | LIGHT)

bg card card2 line

text muted

ACCENT COLOURS (DARK | LIGHT)

Teal (default)

Violet

Amber

CONTRAST (WCAG RATIOS, COMPUTED FROM THE HEX VALUES)

All pairs are at or above 4.5:1 (lowest 5.47:1). The violet and amber options also pass (lowest 6.28:1).

Pair	Dark	Light
Text on background	16.91:1	16.67:1
Text on card	15.44:1	18.18:1
Muted text on card	7.65:1	7.17:1
Accent text on card	9.3:1	5.47:1
Button label on accent	9.18:1	5.47:1
Live badge on card	9.01:1	5.48:1
In progress badge on card	10.37:1	7.09:1
Academic badge on card	9.6:1	6.7:1

TYPOGRAPHY

Display: Bricolage Grotesque 800

Titles 21, 20 and 18 px, letter spacing about -0.02em

Body: Figtree 15 px, regular, semibold and bold

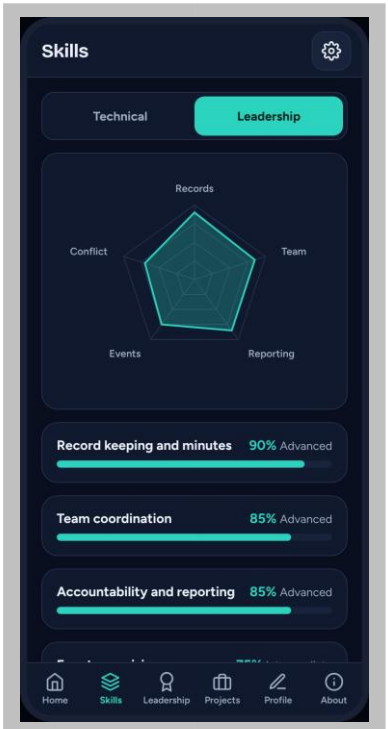

SMALL CAPS LABELS: 12 PX, BOLD, 0.08EM

- SPACING AND SHAPE

  Screen padding 16, gap 14, card padding 16 (8-point rhythm). Radii: cards 18, hero 22, buttons 14, inputs 12, chips full. Borders are 1 px in the line colour.

- ACCESSIBILITY DECISIONS

  Every pressable has a role, a label and state (selected or expanded); screen titles are headings.

Skills: leadership view

Light theme

Touch targets are at least 44 x 44; inputs have visible labels and an accent border on focus.

Status uses text as well as colour; error text sits under its field.

Layouts use wrapping rows and no fixed text heights so text can reflow at larger system sizes; results are recorded in the test log.

Reduced motion switches off the ticker, ring spin, pulse and count-up.
